

3M™ Diamond Grade™ Reflectors
Series 989

Improve vehicle visibility
With Superior Reflectivity

3M

Bright, economical and easy to apply

3M™ Diamond Grade™ Reflectors Series 989 are designed to make vehicles and trailers more visible at night, exceeding DOT and SAE A requirements. 3M reflectors feature retroreflective prismatic lenses in a durable, transparent, synthetic resin that is sealed and backed with an aggressive pressure sensitive adhesive and clear poly liner.

3M reflectors with pressure sensitive adhesive are less labor-intensive to apply because no screws are required—making them an economical alternative to molded reflectors. In addition, 3M reflectors have almost no profile from the surfaces to which they are applied, so they are less susceptible to knock-off and other types of damage.

Application Information

Adhesive	Pressure sensitive
Application substrates	Aluminum, stainless steel and painted surfaces
Application temperature range	40° to 100 ° F (4° to 38° C)

Product availability

Reflectors are available in a vivid red or amber color in both round and rectangular shapes.

Product #	Description	Size
989-72	Red reflector Rectangular 500 per roll	2" x 3.5"
989-74	Amber reflector Rectangular 500 per roll	2" x 3.5"
989-72-3 989-72-4	Red reflector Round 50 per pack	3" and 4"
989-74-3 989-74-4	Amber reflector Round 50 per pack	3" and 4"
