Green Wave NAR Gummed Tape

Product Description Green Wave has been developed in response to the global demand for a more environmentally responsible carton sealing tape. Green Wave is a reinforced water activated tape that is made with more environmentally friendly materials and an energy conserving process.

Green Production Green Wave is laminated with an alternative to hot melt. Hot melt is a derivative of propane and is used to laminate traditional reinforced tape. Hot melt requires a considerable amount of energy to prepare for lamination. Green Wave is a more environmentally friendly product because it requires considerably less energy to produce.

Application Ideas Carton sealing and bundling

Typical Physical Properties

Property	Data
Paper	Repulpable, recyclable, biodegradable
Reinforcement	Polyester - Cross Machine
Adhesive	Repulpable, recyclable, biodegradable
Laminant	Exclusive "Green" Eco-Friendly laminant

NOTE:

1. When applying pressure sensitive adhesive films to any surface, be sure that the surface is free from oil or other surface contaminants such as powder, dust or release agents. Adhesive performance should be carefully checked when used on substrates containing plasticizers..
2. The above values are "Typical Values" which have a nominal range about them and are not intended for specification purposes.
